The „Secret Garden” Sensory Garden

Scoala Primara EuroEd, IAȘI

PROIECT ERASMUS+ TELESPA 2018-1-RO01-K201-049545

The "Secret Garden" is a learning space specially designed for children between 2 and 10 years old. The garden was made as a place specially designed to stimulate the 12 senses.

In relation with senses involving children’s body there are areas that have been designed to invite tactile exploration in the sensory alley that includes stones, wood, bottle caps, nuts etc., to satisfy the need for movement of children and through strategically placed tires and not only. In relation to the outside world we can distinguish the sense of taste, sight, and the one of temperature that are stimulated by everything that is present in the "Secret Garden". There is also a special area with herbs to stimulate the taste, and the sense of temperature, because there are natural stones that children can feel hot or cold according to the temperature outside.

The immaterial, spiritual world is present in our garden through musical instruments (both classical and reinvented), the sense of speech through the reading corner, and the sense of ego through mirrors and various games with lights and shadows.
