The „Secret Garden” Sensory Garden

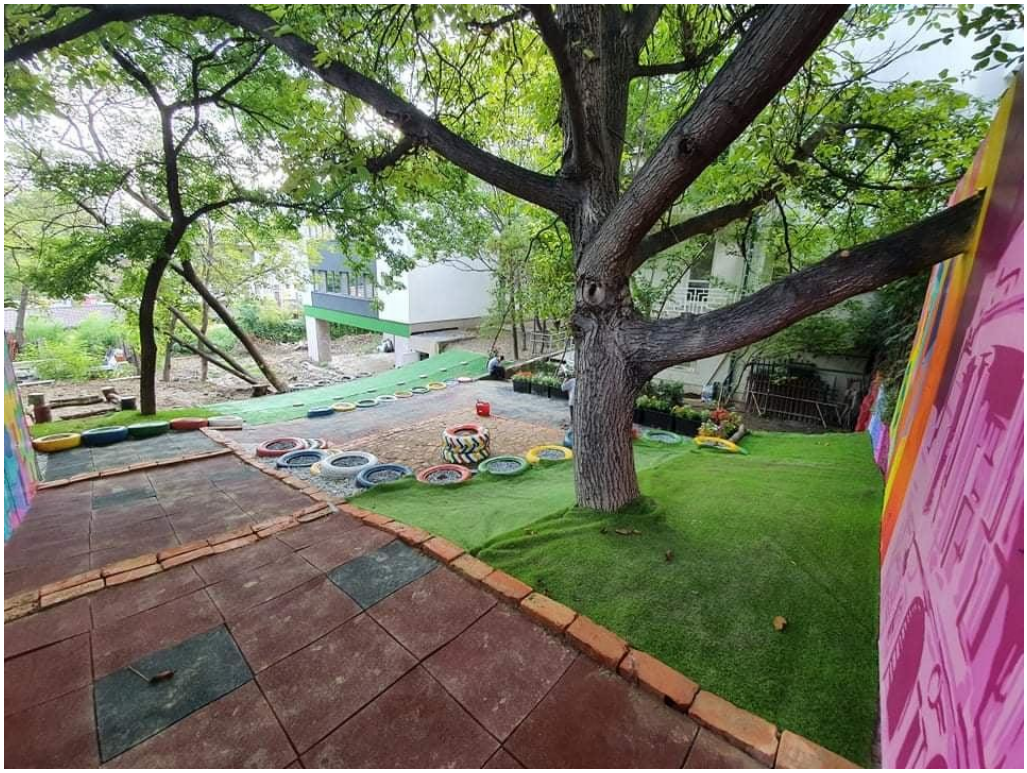
Scoala Primara EuroEd, IAȘI

PROIECT ERASMUS+ TELESPA 2018-1-RO01-K201-049545

The making of the sensorial garden...

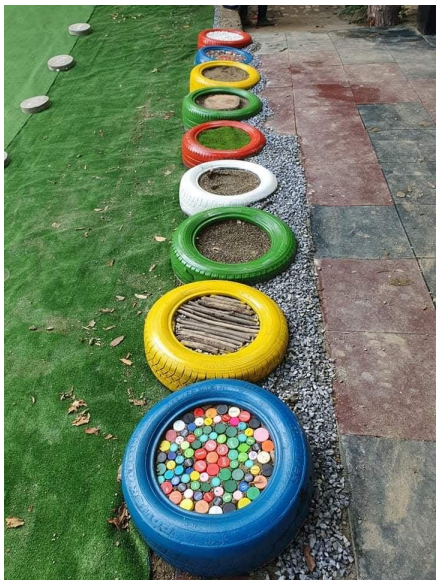
...in the beggining there was nothing but raw land that needed help to bloom ☺

...and then with wood, tyres, bricks and more it started to look way better ☺



The garden was designed to stimulate the 12 senses. According to R. Steiner's twelve senses can be grouped into three categories.

1. Senses which relate to the perception of your body: the senses of touch, of life, of movement, of balance



2. Senses related to the perception of the external world: smell, taste, sight, temperature

3. Senses related to the perception of the immaterial, spiritual world: hearing, speech, thought, ego
